

PERSONALIZED SPATULA SUPPLIES

BBQ tool with wooden handle (Reject Shop, Shiploads, Supermarket, Kmart , Bunnings etc). Any tool with a wooden handle will work. How about making a personalized hammer!

- Tool with wooden handle
- Fine to medium sandpaper
- Paint Pens (Uni Posco or similar) or paint
- Mod Podge & foam brush (optional)

Lightly sand the entire wooden handle with medium to fine sandpaper. This will help the paint adhere securely to the handle.

Now you are ready to personalize! Paint pens are great as they are a no-mess way to paint, the medium and fine tips allow a child (or adult) to write with paint with great success (they are also versatile! They paint on wood, metal, ceramic, plastic and fabric!) but any paint would work.

With the paint, personalize the wooden handle.

Allow the paint to completely dry (about 15 mins). Once dry add a coat of mod podge to protect the paint (optional).

Now, dad has a useful and heartfelt gift!
